

Wood Outswing Sectional Plan Views

LaCantina Doors Wood outswing frame depth is 5 5/8" as standard, suitable for common 2 x 4 framing with stucco and drywall. An optional 2" wood jamb extension is available. It is supplied separately, which allows the wood frame depth to be extended on interior for thicker wall conditions or desired trim detail. The location of the LaCantina Doors frame in the wall condition will also depend on the trim detail desired. We do not supply brick mould or casings.
